

ANOTHER IMPORTANT NAVAL STORES DEAL

Immense Turpentine Farm of J. B. McDonald Changes Hands.

23 CROPS ARE IN OPERATION

The Farm, Situated in the Vicinity of Fairbanks, is One of the Largest and Most Profitable in the County—D. E. Godwin, Manager.

Another deal of more than ordinary importance in naval stores circles has been consummated in this city. C. W. Chase having purchased from J. B. McDonald his immense naval stores interests situated at Fairbanks, and embracing an area of several thousand acres of fine timber, and twenty-three crops in operation. This is one of the most extensive and has proved one of the most profitable turpentine farms in the county. It was established about five years ago by B. F. McCall, who, after working the same a couple of years, sold the property to J. B. McDonald & Co. Mr. McDonald acquired eventually the entire business, and has been operating it continuously until the transfer was made to Mr. Chase.

Mr. Chase, the purchaser of this farm, is president of the Dutton Phosphate Company, who are among the most extensive miners of high-grade phosphate rock in the United States. He has always been active in building up the commercial interests of this section of the State, and to his excellent business management is largely due the magnificent success of that firm. Always conservative in his business ideas and views, his associates hold his opinion in confidence, and he is regarded as one of the safest directors of large business affairs in the State.

Mr. McDonald could not be seen by the reporter, hence it is not known what his future plans will be, but it is reported that he will engage in business in Denver, Colo.

D. E. Godwin has been installed as manager of this property.

FIVE INJURED BY EXPLOSION.

One Man Is Supposed To Be Fatally Injured—Terrific Shock.

New York, Sept. 20.—Five men were seriously injured, and one, Patrick Brady, will probably die, as a result of the explosion of a 1600 horse power boiler in the United Electric Light and Power company in East Twenty-ninth street, last night.

In the room where the explosion occurred are 15 1600-horse power boilers. Matthew Kerr, the engineer, 12 firemen and half a dozen coal passers, were keeping the boilers going when there came a roar from boiler No. 5. Dazed by the shock and blistered by the steam, the men made a wild rush for safety, and most of them escaped before they were seriously burned.

It was discovered later that Brady was missing, and one of the men dashed back into the scalding steam and stumbled across Brady's body. He was dragged out unconscious, and terribly scalded.

The force of the explosion shook the buildings for several blocks around.

FLOODS COST ROAD \$2,000,000.

Santa Fe Railroad Is a Heavy Loser on Account of High Waters.

Chicago, Sept. 20.—Western floods caused the Santa Fe railroad a loss of more than \$2,000,000 in the fiscal year just closed. This is stated in the annual report made public yesterday, showing gross earnings amounting to more than \$68,000,000. It is said the Santa Fe's new trans-continental line will be completed by the end of this year.

The line will be shorter than the Trinidad route; will avoid two mountain ranges between Trinidad and Albuquerque, and will be less exposed to interruption by freshets. By the close of the year it is given out, a total of 322 miles of double track will have been completed, the longest stretch of which is between Holiday and Emporia, 54 miles. Sixteen miles of double track already are in operation, and the total double track construction for the year will be 161 miles.
